

Are you protected?

The His Hop Radio Network is licensed by BMI & ASCAP. This means HisHopNation.com is allowed to stream music 24/7. We are not able to protect music streaming on any other website. If you are streaming music on your own website please understand that you are not covered under the His Hop Network.

How can I make sure I'm covered?

On your website create a link back to your stations radio player page located on the HisHopNation.com. You can always create a player link on your website that will redirect them. Having our badge on your website only does not protect your radio station.
